

Safetyfunction in enclosure for consumer units

Economic Emergency Stop Module with 4 NO contacts

Dold presents with safemaster IP5924 a special economic emergency stop module. The output has 4 NO safety contacts and it is built into an enclosure for consumer units with only 59 mm depth.

The safemaster protects operators and machines. It can be used in safety circuits according to IEC/EN 60204 and it fulfils the safety category 4 according to EN 954-1. The main applications are single channel e-stop circuits of machines and plants

The e-stop module is available for AC/DC24, 48, AC110 or 230V. The contacts are for thermal currents up to 7A. Two LEDs indicate operation and status of outputs.
