Translation of the original instructions

10 -

- According to IEC/EN 60255-1
- Monitoring of
- Under- and overvoltage
- Asymmetry
- Phase failure
- Phase sequence
- Adjustable response delay between 0.1 ... 5 s
- One LED in each case for:
- Auxiliary voltage A1/A2
- Overvoltage U
- Undervoltage Umin.
- Asymmetry / Phase sequence / Power failure
- Contact position
- Closed circuit operation
- 2 changeover contacts
- As option available with open circuit operation
- Width 45 mm

## Approvals and Markings

## Applications

For monitoring three-phase networks for undervoltage, overvoltage, phase sequence, asymmetry, power failure.

## Indication

1. LED A1 / A2:

On, when operating voltage present
2. LED $U_{\text {max }}$ :
3. LED $U_{\min }$ :
4. LED $\Delta$ :

On, in event of undervoltage
On, in event of undervoltage
On, in event of:

- Asymmetry
- Incorrect phase sequence
- Power failure

5. LED:

## Notes

Measurement procedures: arithmetical mean value measurement over several half-waves of rectified phase voltages L1/L2 and L2/L3. Reference phase is L3. Networks with or without neutral can be monitored. The auxiliary voltage to be applied to A1/A2 can also be taken from the threephase network which is to be monitored. This reduces to $0.8-1.1 U_{H}$ the permitted range of voltage of the network to be monitored.

## Connection Terminals

| Terminal designation | Signal description |
| :--- | :--- |
| L1, L2, L3 | Connection phase voltage (L1, L2, L3) |
| A1, A2 | Auxiliary voltage |
| $11,12,14$ | Indicator relay (1. C/O contact) |
| $21,22,24$ | Indicator relay (2. C/O contact) |

With UL-approval on request With CCC-approval on request
Open circuit operation
Output relay
indicates only under- and overvoltage With extended temperature range of

## $-40 \ldots+70^{\circ} \mathrm{C}$

## Remark

At an ambient temperature of $+70^{\circ} \mathrm{C}$ the device has to be mounted with 2 cm space to the neighbour units and the necessary air circulation must be provided.
The contact current must not be more then 2 A.
The life of the product may be reduced by the higher ambient temperature!
