

Insulated Enclosure KO 4717

with box terminals
for machine soldering or plug-in technology

- Width 100 mm
- Max. 30 box terminals with captive plus-minus-screws
- Electrical connection of PCB to terminal in machine soldering or plug-in technology
- Mounting of SMD components possible on soldering side
- Optionally with changeable plate
- Spacer for PCB coding
- Optionally with removable terminal strip for plug-in technology
- Optionally with Blanking strip

Outer dimensions: 100 x 73.2 x 118.2 mm
Enclosure material: PC-GF, base black, front colour see table

Temperature stability:	
complying with UL 746 B:	125 °C
complying with Vicat	
ISO 306 Meth. B:	148 °C
compl.with ISO 75-2 Meth. A:	138 °C
	Meth. B: 144 °C

Max. permitted power dissipation: 29 W for stand alone enclosure at normal climate 23/50-1 ISO 554

Specific thermal resistance: $R_{th} = 3 \text{ K/W}$ for stand alone enclosure

Flame retardancy: V-0; Plate clear = V-2
 complying withh UL 94: BH 2-30
 complying with IEC 60 707:

Number of terminals: 30, < 30 on request

Terminal material
solder technology: CuSn tin-plated
plug-in technology: CuBe tin-plated
Max. cross section for connection: each 1 x 4 mm² solid
 each 1 x 2.5 mm² stranded ferruled DIN 46 228-1/-2/-3/-4
 each 2 x 1.5 mm² stranded ferruled DIN 46 228-1/-2/-3/-4
 10 mm

Insulation of wires length:
Max. cross resistance to printed circuit board: 10 mΩ $\hat{=}$ 1 W / terminal (power dissipation)

Max. current carrying capacity
machine soldering: 16 A
plug-in technology: 10 A

Wire fastening
soldering and plug-in technology: captive plus-minus terminal screws M3.5
 box-terminals with self-raising wire protection
 terminal strip removable separately

plug-in technology:
Torque: max. 0.8 Nm

Connection inside: machine solderable solder pins
plug-in technology: direct plug-in on PCB

Enclosure fastener:
 1) Snap-on fastener on top hat rail EN 50 022
 2) screw fixing with retractable clips, fastening dimensions 80 mm for 2 screws M4

Creepage current resistance: CT1 175 $\hat{=}$ insulating material III a IEC 60 664-1
Air gap and creepage distance: $\geq 3.3 \text{ mm}$ IEC 60 664-1

Type of protection: Enclosure IP 40 IEC 60 529
 Terminals IP 20 IEC 60 529
 contact protection complies with VBG 4

Print area: 100 x 42 mm (on front plate)

Printed circuit board: see printed circuit design

Printed circuit board holder: Guide ribs on the small side and on the enclosure bottom for 5 PCBs

Net-weight: 250 g
Accessories: clips for screw fixing

		plug-in technology			solder techn. clear

Notes on Housing Opening

Enclosure for solder technology

1. Tool
 - for all functions use 0,8 x 4,0 or 0,8 x 4,5 screwdriver
2. Removing of frame
 - Insert a screwdriver in the side recesses of the base (underneath)
 - With light pressure, turn the screwdriver to the left or right.
 - The snap-in lug of the frame disengages.
 - Repeat disengaging process on opposite side. The frame can be removed.

Enclosure for plug-in technology

To remove the front plate first unscrew the terminal strips fixing screws and lift off the terminal strips.

To remove front-frame insert an 0,8 x 4,0 or 0,8 x 4,5 screwdriver into the side recess, on the hood, and turn lightly to the left or right until the snap-in lug disengages. Repeat in the opposite side.
